

GREENJAY PROTECTIVE GROUP

Engineered Protection. Uncompromising Discretion.

PROTECTION IS NOT A COLLECTION OF SERVICES. IT IS A STANDARD.

In a world of interconnected risks, true security is not achieved through visible presence, but through quiet foresight. It is a seamless integration of human intelligence, digital resilience, and physical integrity.

Our standard is governed by experience, engineered through technology, and sustained through disciplined oversight.

THE LEADERSHIP

JENNIFER PANIAGUA

ROBINSON PANIAGUA

Greenjay's integrated methodology is embodied by its founders. Their distinct, yet complementary, backgrounds in elite law enforcement and military special operations form the foundation of our capabilities.

JENNIFER PANIAGUA

Co-Founder & Director of Protective Operations

The Human Element: Procedural Excellence

Key Attributes

- **Decade of Law Enforcement:** A career built on frontline investigative and protective experience, from uniformed patrol to dignitary protection.
- **Investigative Rigor:** Specialized expertise in methodical investigation, evidence handling, and borough-level quality control and oversight.
- **Dignitary Protection:** Formal certification and operational experience in dignitary and executive protection, bridging intelligence and execution.
- **Inclusive Focus:** A deep understanding of inclusive, family-oriented, and female-centric protective strategies.

AREAS OF MASTERY

Investigative & Advisory

- Criminal & Endangered Person Investigations

- Investigative Quality Control & Case Review

- Law Enforcement Advisory & Procedural Compliance

Protective Operations

- Protective Intelligence & Advance Planning

- Dignitary & Executive Protection Operations

- Interviewing & Information Development

Inclusive Protection Strategies: Tailoring services to the specific needs of women, families, and diverse principals, ensuring services are effective, respectful, and responsive.

ROBINSON PANIAGUA

Founder & Managing Director

The Technical Architect: Engineered Resilience

Key Attributes

- **U.S. Army Special Forces:** Elite operational experience in intelligence, HUMINT, and high-risk protective services in wartime environments.
- **Master's in Engineering:** Deep expertise in communications, surveillance technology, artificial intelligence, and secure systems architecture.
- **Integrated Domain Expertise:** A rare convergence of covert field operations and advanced technical engineering.
- **Strategic Advisory:** Leadership in designing secure operating conditions across physical, digital, and human domains.

AREAS OF MASTERY

Intelligence & Operations

Human Intelligence (HUMINT)
& Covert Operations

Threat Assessments &
Vulnerability Analysis

Executive Protection
(Hostile Environments)

Technical & Engineering

Technical Surveillance
Countermeasures (TSCM)

Secure Communications &
Estate Engineering

Counter-Drone & Electronic
Mitigation

Integrated Protection Design: Architecting seamless security across physical infrastructure, digital networks, and human factors to reduce exposure and eliminate uncertainty.

THE SYNERGY OF INTELLIGENCE AND ENGINEERING

Our doctrine fuses two critical disciplines into a single, proactive standard.

- **Investigative Discipline** ensures every action is lawful, ethical, and informed by methodical, fact-based analysis.
- **Operational Engineering** integrates advanced technology and military-grade planning to mitigate risk before it materializes.

Result: A 360-degree protective ecosystem built on prevention, not reaction.

ENGINEERED SOLUTIONS FOR COMPLEX ENVIRONMENTS

Executive & Family Protection Advisory

Discreet, intelligence-led support for principals and their families, integrating seamlessly into their lifestyle at home and during travel.

Protective Intelligence & Threat Analysis

Proactive identification and assessment of threats across physical, digital, and human landscapes to inform preventative strategies.

Technical Security & Counter-Surveillance (TSCM)

Detecting and mitigating electronic surveillance threats to preserve the sanctity of private conversations and confidential information.

Secure Estate & Communications Engineering

Architecting and integrating resilient security, communication, and command-and-control systems for private residences, offices, and mobile environments.

Specialized Investigations

Conducting discreet, complex investigations with law-enforcement-grade procedural rigor and ethical governance.

OUR COMMITMENT: DISCRETION BY DESIGN

1. BESPOKE ASSESSMENT

We begin with a confidential, holistic understanding of your unique lifestyle, profile, and risk exposure.

2. INTELLIGENCE-LED STRATEGY

Our methodology is driven by proactive intelligence and detailed planning. We favor quiet professionalism over theatrics.

3. SEAMLESS INTEGRATION

We engineer security solutions that enhance, rather than disrupt, your privacy, continuity, and quality of life.

4. PRINCIPLED PARTNERSHIP

We operate as trusted advisors, providing clear, actionable intelligence with absolute discretion and unwavering ethical governance.

AN UNPARALLELED STANDARD OF CARE

Unrivaled Leadership: A rare fusion of elite law enforcement investigation and military special forces engineering.

An Engineered Approach: Proactive, intelligence-driven protection designed for resilience in a complex and interconnected world.

Absolute Discretion: Our mission is to provide peace of mind and operational continuity, invisibly.

A Trusted Advisor: A partner in preserving your safety, privacy, and legacy.
